3. RESEARCH EXPERTISE

Throughout my research career I have developed a solid expertise in the non-clinical characterization and certification of advanced medicinal product. The main focus of my past and current work is to support the accomplishment of clinical trials with the use of human neural stem cells (hNSCs) for the cure of neurodegenerative and neurological diseases. This objective has been pursued through the implementation of *in vitro* and *in vivo* complementary research projects conceived to optimize culture conditions, to study the molecular mechanisms sustaining the functional properties (self-renewal and multipotency) and to assess safety and therapeutic efficacy of hNSCs lines derived from fetal brain and from induced Pluripotent Stem Cell (hiNSCs).

Research network:

Along with my research projects I have developed effective collaborations within Italian and European Networks in the field such as:

- **University of Milano-Bicocca, Dep. of Biotechnology and Biosciences.**
- **COST ACTION EUROPEA (CA16122): Biomaterials and Advanced Physical Techniques for regenerative cardiology and neurology (<https://bioneca.eu/working-groups/>).** BIONECA aims to become the most effective instrument in coordination, harmonization and defragmentation of the stem cell research across Europe and world, bringing unification of protocols for application of stem cells for neurological and cardiovascular diseases. It involves 37 European countries.
- **Andalusian Network for the design and translation of Advanced Therapies (ANDTAT) (<https://www.sspa.juntadeandalucia.es/terapiasavanzadas/index.php/en/>)** ANDTAT is an Andalusian Government agency promoted to foster research in the field of advanced therapies to develop safe and efficient treatments to offer to the population. The agency coordinates a network of Andalusian GMP facilities to develop clinical trials with advanced medicinal products. I have been involved in:
 - education (as docent for the “*Master degree in manufacturing of advanced therapy medicinal product*”)
 - research project (scientific head of a collaboration research project).
- **Fondazione IRCCS Casa Sollievo della Sofferenza e Istituto Mendel di Roma.** Main collaborators: Dott.ssa Jessica Rosati, Dott. Maurizio Gelati, Dott.ssa Daniela Profico. Basic and pre-clinical research project as from a Collaborative Research Agreement between the University Milano-Bicocca and IRCCS
