WHY BICOCCA

Bicocca is a young university that will connect you with students from all over the world. You will not just be a student here. You will be a member of the global community.

Since its foundation, the University of Milano-Bicocca has reached beyond its borders entering into various agreements with European and non-European universities.

Research is always global. Our teachers are members of international research groups that share numerous projects and initiatives, with a common commitment to increase the quality of teaching. Our focus on innovation offers students competitive and practical training.

STUDY EDUCATION @MILANO-BICOCCA

The field of Education Science at the University of Milano-Bicocca offers an interdisciplinary approach and an unrivalled depth and breadth of expertise across education, inter-cultural communication, anthropology and teacher education.

The department brings together the following degree programs:

B 2 Bachelor degrees

M 3 Master degrees

SCMD 1 Single Cycle Master Degree

OUR INTERNATIONAL OFFER

In the field of Education Science, our University does not offer an entire degree program in English.

There are a total of 7 individual courses taught entirely in English.

OUR LOCATION

All courses in the field of Education Science are held at our Milan campus.

MEDICAL ANTHROPOLOGY

LECTURER: ALUNNI LORENZO

CONTENTS

In this course, students will develop knowledge and critical understanding of social, cultural, political and economical dimensions concerning health and body issues. In what ways are health and illness matters of interpretation and belief in different societies? How do they involve and shape social interactions and social organization among individuals and groups? How do they reflect and influence political and economic relations? To answer such questions, this course focuses on ethnographic approaches on issues regarding health and illness in different contexts worldwide.

One theme that ties together the diverse topics of the course is the production of anthropological knowledge about health, suffering, and medicine. Particular attention will be dedicated to the anthropological analysis of global inequalities linked to the field of health, in order to better understand some of the most complex contemporary contexts and issues across ethnographic cases from the five continents.

PREREQUISITES

General knowledge of the main anthropological theories and methodological approaches. Familiarity with ethnographic fieldwork methodology.
