## **RESEARCH EXPERTISE**

Throughout my research career I have developed a solid expertise in the non-clinical characterization and certification of advanced medicinal product. The main focus of my past and current work is to support the accomplishment of clinical trials with the use of human neural stem cells (hNSCs) for the cure of neurodegenerative and neurological diseases. This objective has been pursued through the implementation of *in vitro* and *in vivo* complementary research projects conceived to assess safety and therapeutic efficacy of hNSCs lines derived from fetal brain and from iPSCs (ihNSCs).
